

Human Pancreatic Polypeptide (PP) ELISA Kit | PP elisa kit

Human Pancreatic Polypeptide (PP) ELISA Kit

CATALOG #
AAA182258

REACTIVITY
Human

PRODUCT SYNONYMS

Pancreatic Polypeptide (PP); Human Pancreatic Polypeptide (PP) ELISA Kit; PPY; PNP; Pancreatic Polypeptide Y; Obinepitide; Pancreatic icosapeptide; Pancreatic prohormone; PP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Pancreatic Polypeptide (PP). No significant cross-reactivity or interference between Pancreatic Polypeptide (PP) and analogues was observed.
Sequence Length	95
Assay Type	Competitive Inhibition
Samples	Serum, Plasma and Other Biological Fluids
Detection Range	37.0-3,000pg/mL
Sensitivity	< 14.2pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Pancreatic Polypeptide (PP) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Pancreatic Polypeptide (PP) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for PP elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Pancreatic Polypeptide (PP) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Pancreatic Polypeptide (PP) and unlabeled Pancreatic Polypeptide (PP) (Standards or samples) with the pre-coated antibody specific to Pancreatic Polypeptide (PP). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Pancreatic Polypeptide (PP) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Pancreatic Polypeptide (PP) in the sample.

NCBI AND UNIPROT INFORMATION

NCBI GI #	119572034
NCBI GeneID	5539
UniProt Accession #	P01298
Molecular Weight	18,786 Da
NCBI Official Full Name	pancreatic polypeptide
NCBI Official Synonym Full Names	pancreatic polypeptide
NCBI Official Symbol	PPY
NCBI Official Synonym Symbols	PP; PNP
NCBI Protein Information	pancreatic prohormone
UniProt Protein Name	Pancreatic prohormone
UniProt Gene Name	PPY
UniProt Synonym Gene Names	PNP; PP; PH; PI

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
