

## Rat Glycoprotein 130 (gp130) ELISA Kit | gp130 elisa kit

Rat Glycoprotein 130 (gp130) ELISA Kit

CATALOG #  
AAA182589

REACTIVITY  
Rat

### PRODUCT SYNONYMS

Glycoprotein 130 (gp130); Rat Glycoprotein 130 (gp130) ELISA Kit; CDw130; CD130; IL6ST; GP130-RAPS; IR6RB; IL6R-Beta; IR6-RB; Interleukin 6 Signal Transducer; Oncostatin M Receptor; Interleukin-6 Receptor Subunit Beta; gp130 elisa kit

| Reactivity                                        | Rat                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Glycoprotein 130 (gp130). No significant cross-reactivity or interference between Glycoprotein 130 (gp130) and analogues was observed.                                                                                                                                                                                                                                                                          |
| Sequence Length                                   | 49                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for gp130 elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Glycoprotein 130 (gp130). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Glycoprotein 130 (gp130). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Glycoprotein 130 (gp130), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Glycoprotein 130 (gp130) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
