

Human CCAAT/Enhancer Binding Protein Alpha (CEBPa) ELISA Kit | CEBPa elisa kit

Human CCAAT/Enhancer Binding Protein Alpha (CEBPa) ELISA Kit

CATALOG #
AAA183737

REACTIVITY
Human

PRODUCT SYNONYMS

CCAAT/Enhancer Binding Protein Alpha (CEBPa); Human CCAAT/Enhancer Binding Protein Alpha (CEBPa) ELISA Kit; CEBP-A; CEBPa elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of CCAAT/Enhancer Binding Protein Alpha (CEBPa). No significant cross-reactivity or interference between CCAAT/Enhancer Binding Protein Alpha (CEBPa) and analogues was observed.
Sequence Length	357
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.055ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level CCAAT/Enhancer Binding Protein Alpha (CEBPa) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level CCAAT/Enhancer Binding Protein Alpha (CEBPa) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CEBPa elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to CCAAT/Enhancer Binding Protein Alpha (CEBPa). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to CCAAT/Enhancer Binding Protein Alpha (CEBPa). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CCAAT/Enhancer Binding Protein Alpha (CEBPa), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of CCAAT/Enhancer Binding Protein Alpha (CEBPa) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1877205
NCBI GeneID	1050
UniProt Accession #	P49715; P78319; Q05CA4; A7LNP2
Molecular Weight	41,249 Da
NCBI Official Full Name	CCAAT/enhancer binding protein alpha
NCBI Official Synonym Full Names	CCAAT/enhancer binding protein alpha
NCBI Official Symbol	CEBPA
NCBI Official Synonym Symbols	CEBP; C/EBP-alpha
NCBI Protein Information	CCAAT/enhancer-binding protein alpha
UniProt Protein Name	CCAAT/enhancer-binding protein alpha
UniProt Gene Name	CEBPA
UniProt Synonym Gene Names	C/EBP alpha

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
