

Mouse Taxilin Alpha (TXLNa) ELISA Kit | TXLNa elisa kit

Mouse Taxilin Alpha (TXLNa) ELISA Kit

CATALOG #
AAA184420

REACTIVITY
Mouse

PRODUCT SYNONYMS

Taxilin Alpha (TXLNa); Mouse Taxilin Alpha (TXLNa) ELISA Kit; IL14; TXLN; HMW-BCGF; High Molecular Weight B-Cell Growth Factor; Interleukin 14; TXLNa elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Taxilin Alpha (TXLNa). No significant cross-reactivity or interference between Taxilin Alpha (TXLNa) and analogues was observed.
Sequence Length	546
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates and Other Biological Fluids
Detection Range	15.6-1000pg/mL
Sensitivity	< 5.6pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Taxilin Alpha (TXLNa) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Taxilin Alpha (TXLNa) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for TXLNa elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Taxilin Alpha (TXLNa). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Taxilin Alpha (TXLNa). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Taxilin Alpha (TXLNa), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Taxilin Alpha (TXLNa) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	74355476
NCBI GeneID	200081
Molecular Weight	61,891 Da
NCBI Official Full Name	Taxilin alpha
NCBI Official Synonym Full Names	taxilin alpha
NCBI Official Symbol	TXLNA
NCBI Official Synonym Symbols	IL14; TXLN
NCBI Protein Information	alpha-taxilin
UniProt Protein Name	Alpha-taxilin
UniProt Gene Name	TXLNA
UniProt Synonym Gene Names	TXLN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
