

Mouse Thy1 Cell Surface Antigen (Thy1) ELISA Kit | Thy1 elisa kit

Mouse Thy1 Cell Surface Antigen (Thy1) ELISA Kit

CATALOG #
AAA184671

REACTIVITY
Mouse

PRODUCT SYNONYMS

Thy1 Cell Surface Antigen (Thy1); Mouse Thy1 Cell Surface Antigen (Thy1) ELISA Kit; CD90; CDw90; THY mocyte differentiation antigen 1; Thy1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Thy1 Cell Surface Antigen (Thy1). No significant cross-reactivity or interference between Thy1 Cell Surface Antigen (Thy1) and analogues was observed.
Sequence Length	161
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Urine, Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	12.50-800pg/mL
Sensitivity	< 5.7pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Thy1 Cell Surface Antigen (Thy1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Thy1 Cell Surface Antigen (Thy1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for Thy1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Thy1 Cell Surface Antigen (Thy1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Thy1 Cell Surface Antigen (Thy1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Thy1 Cell Surface Antigen (Thy1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Thy1 Cell Surface Antigen (Thy1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	119587894
NCBI GeneID	7070
UniProt Accession #	P04216; Q16008; Q9NSP1
Molecular Weight	17,935 Da
NCBI Official Full Name	Thy-1 cell surface antigen, isoform CRA_a
NCBI Official Synonym Full Names	Thy-1 cell surface antigen
NCBI Official Symbol	THY1
NCBI Official Synonym Symbols	CD90; CDw90
NCBI Protein Information	thy-1 membrane glycoprotein
UniProt Protein Name	Thy-1 membrane glycoprotein
UniProt Gene Name	THY1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
