

Human Collectin Liver 1 (CLL1) ELISA Kit | CLL1 elisa kit

Human Collectin Liver 1 (CLL1) ELISA Kit

CATALOG #
AAA184767

REACTIVITY
Human

PRODUCT SYNONYMS

Collectin Liver 1 (CLL1); Human Collectin Liver 1 (CLL1) ELISA Kit; COLEC10; CL-L1; CL-34; Collectin Sub-Family Member 10; C-Type Lectin; Collectin-10; Collectin-34; CLL1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Collectin Liver 1 (CLL1). No significant cross-reactivity or interference between Collectin Liver 1 (CLL1) and analogues was observed.
Sequence Length	277
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates and Other Biological Fluids
Detection Range	1.56-100ng/mL
Sensitivity	< 0.55ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Collectin Liver 1 (CLL1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Collectin Liver 1 (CLL1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CLL1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Collectin Liver 1 (CLL1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Collectin Liver 1 (CLL1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Collectin Liver 1 (CLL1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Collectin Liver 1 (CLL1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	256017186
NCBI GeneID	10584
NCBI Accession #	NP_006429.2
NCBI GenBank Nucleotide #	NM_006438.4
Molecular Weight	30,705 Da
NCBI Official Full Name	collectin-10 isoform 1
NCBI Official Synonym Full Names	collectin subfamily member 10
NCBI Official Symbol	COLEC10
NCBI Official Synonym Symbols	3MC3; CLL1; CL-34
NCBI Protein Information	collectin-10
UniProt Protein Name	Collectin-10
UniProt Gene Name	COLEC10
UniProt Synonym Gene Names	CLL1; CL-L1; CL-34

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
