

Human Tryptophanyl tRNA Synthetase (WARS) ELISA Kit | WARS elisa kit

Human Tryptophanyl tRNA Synthetase (WARS) ELISA Kit

CATALOG #
AAA185025

REACTIVITY
Human

PRODUCT SYNONYMS

Tryptophanyl tRNA Synthetase (WARS); Human Tryptophanyl tRNA Synthetase (WARS) ELISA Kit; GAMMA-2; IFI53; IFP53; WRS; TrpRS; hWRS; Tryptophan tRNA Ligase 1; Cytoplasmic; Interferon-induced protein 53; Tryptophanyl-tRNA synthetase; WARS elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Tryptophanyl tRNA Synthetase (WARS). No significant cross-reactivity or interference between Tryptophanyl tRNA Synthetase (WARS) and analogues was observed.
Sequence Length	336
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	1.56-100ng/mL
Sensitivity	< 0.57ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Tryptophanyl tRNA Synthetase (WARS) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Tryptophanyl tRNA Synthetase (WARS) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for WARS elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Tryptophanyl tRNA Synthetase (WARS). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Tryptophanyl tRNA Synthetase (WARS). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Tryptophanyl tRNA Synthetase (WARS), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Tryptophanyl tRNA Synthetase (WARS) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	24413784
NCBI GeneID	1098771
UniProt Accession #	Q8CJX0
Molecular Weight	36,804 Da
NCBI Official Full Name	tryptophanyl tRNA synthetase
NCBI Official Symbol	SCO3334
NCBI Official Synonym Symbols	SCE68.32; SCE7.01; trpS
NCBI Protein Information	tryptophanyl-tRNA synthetase
UniProt Protein Name	Tryptophan--tRNA ligase 1
UniProt Gene Name	trpS1
UniProt Synonym Gene Names	TrpRS 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
