

Human Glycoprotein VI, Platelet (GP6) ELISA Kit | GP6 elisa kit

Human Glycoprotein VI, Platelet (GP6) ELISA Kit

CATALOG #
AAA185226

REACTIVITY
Human

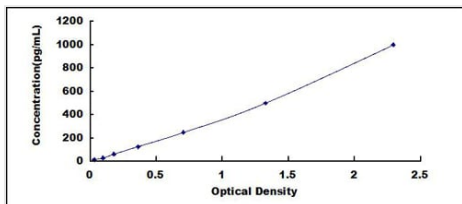

PRODUCT SYNONYMS

Glycoprotein VI; Platelet (GP6); Human Glycoprotein VI; Platelet (GP6) ELISA Kit; GPIV; GP-VI; GP6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Glycoprotein VI, Platelet (GP6). No significant cross-reactivity or interference between Glycoprotein VI, Platelet (GP6) and analogues was observed.
Sequence Length	620
Assay Type	Double-antibody Sandwich
Samples	Plasma
Detection Range	15.6-1000pg/mL
Sensitivity	< 6.3pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Glycoprotein VI, Platelet (GP6) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Glycoprotein VI, Platelet (GP6) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for GP6 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Glycoprotein VI, Platelet (GP6). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Glycoprotein VI, Platelet (GP6). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Glycoprotein VI, Platelet (GP6), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Glycoprotein VI, Platelet (GP6) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	26985217
NCBI GeneID	51206
UniProt Accession #	Q9HCN6; Q9HCN7; Q9UIF2
Molecular Weight	67,476 Da
NCBI Official Full Name	glycoprotein VI, partial
NCBI Official Synonym Full Names	glycoprotein VI platelet
NCBI Official Symbol	GP6
NCBI Official Synonym Symbols	GPIV; GPVI; BDPLT11
NCBI Protein Information	platelet glycoprotein VI
UniProt Protein Name	Platelet glycoprotein VI
UniProt Gene Name	GP6
UniProt Synonym Gene Names	GPVICurated

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
