

Human Calpain 1, Large Subunit (CAPN1) ELISA Kit | CAPN1 elisa kit

Human Calpain 1, Large Subunit (CAPN1) ELISA Kit

CATALOG #
AAA185308

REACTIVITY
Human

PRODUCT SYNONYMS

Calpain 1; Large Subunit (CAPN1); Human Calpain 1; Large Subunit (CAPN1) ELISA Kit; PIG30; CANPL1; MuCANP; MuCL; Calpain-1 Catalytic Subunit; Calcium-Dependent Protease 1; Calcium-activated neutral proteinase 1; Calpain mu-type; Micromolar-calpain; CAPN1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Calpain 1, Large Subunit (CAPN1). No significant cross-reactivity or interference between Calpain 1, Large Subunit (CAPN1) and analogues was observed.
Sequence Length	704
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	1.56-100ng/mL
Sensitivity	< 0.58ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Calpain 1, Large Subunit (CAPN1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Calpain 1, Large Subunit (CAPN1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CAPN1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Calpain 1, Large Subunit (CAPN1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Calpain 1, Large Subunit (CAPN1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Calpain 1, Large Subunit (CAPN1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Calpain 1, Large Subunit (CAPN1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	47087455
NCBI GeneID	406768
NCBI Accession #	NP_998624.1
NCBI GenBank Nucleotide #	NM_213459.1
NCBI Official Full Name	calpain 1, large subunit
NCBI Official Synonym Full Names	zgc:55262
NCBI Official Symbol	zgc:55262
NCBI Official Synonym Symbols	Capn1; fj67g01; wu:fj67g01
NCBI Protein Information	calpain 1, large subunit

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
