

## Mouse Amine Oxidase, Copper Containing 3 (AOC3) ELISA Kit | AOC3 elisa kit

Mouse Amine Oxidase, Copper Containing 3 (AOC3) ELISA Kit

CATALOG #  
**AAA185648**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Amine Oxidase; Copper Containing 3 (AOC3); Mouse Amine Oxidase; Copper Containing 3 (AOC3) ELISA Kit; VAP1; HPAO; SSAO; Membrane primary amine oxidase; Vascular Adhesion Protein 1; Semicarbazide-Sensitive Amine Oxidase; Copper-Containing Amine Oxygen Oxidoreductase; AOC3 elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for AOC3 elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Amine Oxidase, Copper Containing 3 (AOC3). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Amine Oxidase, Copper Containing 3 (AOC3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Amine Oxidase, Copper Containing 3 (AOC3), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Amine Oxidase, Copper Containing 3 (AOC3) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
