

## Human Growth Factor Receptor Bound Protein 2 (Grb2) ELISA Kit | Grb2 elisa kit

Human Growth Factor Receptor Bound Protein 2 (Grb2) ELISA Kit

CATALOG #  
**AAA185776**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Growth Factor Receptor Bound Protein 2 (Grb2); Human Growth Factor Receptor Bound Protein 2 (Grb2) ELISA Kit; ASH; NCKAP2; EGFRBP-GRB2; Grb3-3; Adapter protein GRB2; Protein Ash; SH2/SH3 adapter GRB2; Grb2 elisa kit

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

ADDITIONAL INFORMATION

Related Product Information for Grb2 elisa kit

The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Growth Factor Receptor Bound Protein 2 (Grb2). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Growth Factor Receptor Bound Protein 2 (Grb2). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Growth Factor Receptor Bound Protein 2 (Grb2), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Growth Factor Receptor Bound Protein 2 (Grb2) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
