

Human Complement Component 1, Q Subcomponent A (C1qA) ELISA Kit | C1qA elisa kit

Human Complement Component 1, Q Subcomponent A (C1qA) ELISA Kit

CATALOG #
AAA186163

REACTIVITY
Human

PRODUCT SYNONYMS

Complement Component 1; Q Subcomponent A (C1qA); Human Complement Component 1; Q Subcomponent A (C1qA) ELISA Kit; q Subcomponent; Alpha Polypeptide; C1qA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of C1qA. No significant cross-reactivity or interference between C1qA and analogues was observed.
Sequence Length	245
Samples	Human serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	78-5,000pg/mL
Sensitivity	< 35pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level C1qA were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level C1qA were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for C1qA elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to C1qA. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to C1qA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain C1qA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of C1qA in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	119615421
NCBI GeneID	712
UniProt Accession #	P02745; Q5T963; B2R4X2
Molecular Weight	26,017 Da
NCBI Official Full Name	complement component 1, q subcomponent, A chain, isoform CRA_a
NCBI Official Synonym Full Names	complement C1q A chain
NCBI Official Symbol	C1QA
NCBI Protein Information	complement C1q subcomponent subunit A
UniProt Protein Name	Complement C1q subcomponent subunit A
UniProt Gene Name	C1QA

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
