

Human Apolipoprotein A1 Binding Protein (APOA1BP) ELISA Kit | APOA1BP elisa kit

Human Apolipoprotein A1 Binding Protein (APOA1BP) ELISA Kit

CATALOG #
AAA186358

REACTIVITY
Human

PRODUCT SYNONYMS

Apolipoprotein A1 Binding Protein (APOA1BP); Human Apolipoprotein A1 Binding Protein (APOA1BP) ELISA Kit; Apo-A1BP; A1BP; YJEFN1; NAD(P)H-hydrate epimerase; NAD(P)HX epimerase; YjeF N-terminal domain-containing protein 1; APOA1BP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Apolipoprotein A1 Binding Protein (APOA1BP). No significant cross-reactivity or interference between Apolipoprotein A1 Binding Protein (APOA1BP) and analogues was observed.
Sequence Length	249
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Urine, Tissue Homogenates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.061ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Apolipoprotein A1 Binding Protein (APOA1BP) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Apolipoprotein A1 Binding Protein (APOA1BP) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for APOA1BP elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Apolipoprotein A1 Binding Protein (APOA1BP). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Apolipoprotein A1 Binding Protein (APOA1BP). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Apolipoprotein A1 Binding Protein (APOA1BP), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Apolipoprotein A1 Binding Protein (APOA1BP) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	114319001
Molecular Weight	26,954 Da
NCBI Official Full Name	apolipoprotein A1 binding protein
UniProt Protein Name	YjeF N-terminal domain-containing protein 3
UniProt Gene Name	YJEFN3
UniProt Synonym Gene Names	YjeF_N3; hYjeF_N3

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
