

Human Phosphoserine Aminotransferase 1 (PSAT1) ELISA Kit | PSAT1 elisa kit

Human Phosphoserine Aminotransferase 1 (PSAT1) ELISA Kit

CATALOG #
AAA186414

REACTIVITY
Human

PRODUCT SYNONYMS

Phosphoserine Aminotransferase 1 (PSAT1); Human Phosphoserine Aminotransferase 1 (PSAT1) ELISA Kit; PSA; EPIP; Endometrial Progesterone Induced Protein; Phosphohydroxythreonine aminotransferase; PSAT1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Phosphoserine Aminotransferase 1 (PSAT1). No significant cross-reactivity or interference between Phosphoserine Aminotransferase 1 (PSAT1) and analogues was observed.
Sequence Length	324
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.059ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Phosphoserine Aminotransferase 1 (PSAT1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Phosphoserine Aminotransferase 1 (PSAT1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for PSAT1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Phosphoserine Aminotransferase 1 (PSAT1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Phosphoserine Aminotransferase 1 (PSAT1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Phosphoserine Aminotransferase 1 (PSAT1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Phosphoserine Aminotransferase 1 (PSAT1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	17390289
NCBI GeneID	29968
UniProt Accession #	Q9Y617; Q5T7G5; Q5T7G6; Q96AW2; Q9BQ12
Molecular Weight	35,189 Da
NCBI Official Full Name	Phosphoserine aminotransferase 1
NCBI Official Synonym Full Names	phosphoserine aminotransferase 1
NCBI Official Symbol	PSAT1
NCBI Official Synonym Symbols	PSA; EPIP; NLS2; PSAT; PSATD
NCBI Protein Information	phosphoserine aminotransferase
UniProt Protein Name	Phosphoserine aminotransferase
UniProt Gene Name	PSAT1
UniProt Synonym Gene Names	PSA; PSAT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
