

Human RAR Related Orphan Receptor Alpha (RORa) ELISA Kit | RORa elisa kit

Human RAR Related Orphan Receptor Alpha (RORa) ELISA Kit

CATALOG #
AAA186444

REACTIVITY
Human

PRODUCT SYNONYMS

RAR Related Orphan Receptor Alpha (RORa); Human RAR Related Orphan Receptor Alpha (RORa) ELISA Kit; ROR1; ROR2; NR1F1; ROR3; RZRA; Nuclear receptor subfamily 1 group F member 1; Retinoid-related orphan receptor-alpha; RORa elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of RAR Related Orphan Receptor Alpha (RORa). No significant cross-reactivity or interference between RAR Related Orphan Receptor Alpha (RORa) and analogues was observed.
Sequence Length	474
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.056ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level RAR Related Orphan Receptor Alpha (RORa) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level RAR Related Orphan Receptor Alpha (RORa) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for RORa elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to RAR Related Orphan Receptor Alpha (RORa). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to RAR Related Orphan Receptor Alpha (RORa). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain RAR Related Orphan Receptor Alpha (RORa), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of RAR Related Orphan Receptor Alpha (RORa) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	41055082
NCBI GeneID	554722
NCBI Accession #	NP_957361.1
NCBI GenBank Nucleotide #	NM_201067.1
NCBI Official Full Name	RAR-related orphan receptor A, paralog b
NCBI Official Synonym Full Names	RAR-related orphan receptor A, paralog b
NCBI Official Symbol	rorab
NCBI Official Synonym Symbols	Rora; zgc:55954; wu:fq24g04
NCBI Protein Information	RAR-related orphan receptor A, paralog b

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
