

Human Ephrin A1 (EFNA1) ELISA Kit | EFNA1 elisa kit

Human Ephrin A1 (EFNA1) ELISA Kit

CATALOG #
AAA186484

REACTIVITY
Human

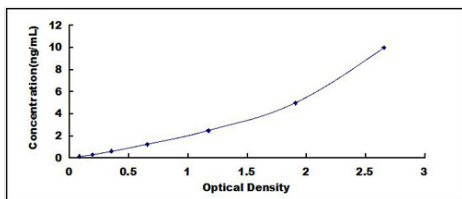

PRODUCT SYNONYMS

Ephrin A1 (EFNA1); Human Ephrin A1 (EFNA1) ELISA Kit; B61; ECKLG; EFL1; EPLG1; LERK1; TNFAIP4; EPH-related receptor tyrosine kinase ligand 1; Tumor necrosis factor alpha-induced protein 4; Immediate early response protein B61; EFNA1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Ephrin A1 (EFNA1). No significant cross-reactivity or interference between Ephrin A1 (EFNA1) and analogues was observed.
Sequence Length	205
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.057ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Ephrin A1 (EFNA1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Ephrin A1 (EFNA1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for EFNA1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Ephrin A1 (EFNA1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Ephrin A1 (EFNA1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Ephrin A1 (EFNA1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Ephrin A1 (EFNA1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	247269690
NCBI GeneID	13636
NCBI Accession #	NP_034237.3
NCBI GenBank Nucleotide #	NM_010107.4
UniProt Accession #	P52793; P97331
Molecular Weight	23,802 Da
NCBI Official Full Name	ephrin-A1 isoform 1
NCBI Official Synonym Full Names	ephrin A1
NCBI Official Symbol	Efna1
NCBI Official Synonym Symbols	B61; Efl1; Epl1; Eplg1; Lerk1; AI325262
NCBI Protein Information	ephrin-A1
UniProt Protein Name	Ephrin-A1
UniProt Gene Name	Efna1
UniProt Synonym Gene Names	Epgl1; Epl1; Lerk1; LERK-1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
