

Human Sodium/Glucose Cotransporter 1 (SGLT1) ELISA Kit | SGLT1 elisa kit

Human Sodium/Glucose Cotransporter 1 (SGLT1) ELISA Kit

CATALOG #
AAA186567

REACTIVITY
Human

PRODUCT SYNONYMS

Sodium/Glucose Cotransporter 1 (SGLT1); Human Sodium/Glucose Cotransporter 1 (SGLT1) ELISA Kit; SLC5A1; NAGT; Solute Carrier Family 5 Member 1; High affinity sodium-glucose cotransporter; Na(+)/glucose cotransporter 1; SGLT1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Sodium/Glucose Cotransporter 1 (SGLT1). No significant cross-reactivity or interference between Sodium/Glucose Cotransporter 1 (SGLT1) and analogues was observed.
Sequence Length	665
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.056ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Sodium/Glucose Cotransporter 1 (SGLT1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Sodium/Glucose Cotransporter 1 (SGLT1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SGLT1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Sodium/Glucose Cotransporter 1 (SGLT1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Sodium/Glucose Cotransporter 1 (SGLT1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Sodium/Glucose Cotransporter 1 (SGLT1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Sodium/Glucose Cotransporter 1 (SGLT1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	261824023
NCBI GeneID	20537
NCBI Accession #	NP_062784.3
NCBI GenBank Nucleotide #	NM_019810.4
UniProt Accession #	Q8C3K6
Molecular Weight	73,449 Da
NCBI Official Full Name	sodium/glucose cotransporter 1
NCBI Official Synonym Full Names	solute carrier family 5 (sodium/glucose cotransporter), member 1
NCBI Official Symbol	Slc5a1
NCBI Official Synonym Symbols	Sgt1
NCBI Protein Information	sodium/glucose cotransporter 1
UniProt Protein Name	Sodium/glucose cotransporter 1
UniProt Gene Name	Slc5a1
UniProt Synonym Gene Names	Na(+)/glucose cotransporter 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
