

Human Solute Carrier Family 16, Member 1 (SLC16A1) ELISA Kit | SLC16A1 elisa kit

Human Solute Carrier Family 16, Member 1 (SLC16A1) ELISA Kit

CATALOG #
AAA186584

REACTIVITY
Human

PRODUCT SYNONYMS

Solute Carrier Family 16; Member 1 (SLC16A1); Human Solute Carrier Family 16; Member 1 (SLC16A1) ELISA Kit; MCT1; MCT; Monocarboxylate Transporter 1; Monocarboxylic Acid Transporter 1; SLC16A1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Solute Carrier Family 16, Member 1 (SLC16A1). No significant cross-reactivity or interference between Solute Carrier Family 16, Member 1 (SLC16A1) and analogues was observed.
Sequence Length	430
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma and Other Biological Fluids
Detection Range	0.312-20ng/mL
Sensitivity	< 0.116ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Solute Carrier Family 16, Member 1 (SLC16A1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Solute Carrier Family 16, Member 1 (SLC16A1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SLC16A1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Solute Carrier Family 16, Member 1 (SLC16A1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Solute Carrier Family 16, Member 1 (SLC16A1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Solute Carrier Family 16, Member 1 (SLC16A1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Solute Carrier Family 16, Member 1 (SLC16A1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	119576957
NCBI GeneID	6566
UniProt Accession #	P53985; Q49A45; Q5T8R6; Q9NSJ9
Molecular Weight	46,234 Da
NCBI Official Full Name	solute carrier family 16 (monocarboxylic acid transporters), member 1, isoform CRA_b
NCBI Official Synonym Full Names	solute carrier family 16 member 1
NCBI Official Symbol	SLC16A1
NCBI Official Synonym Symbols	MCT; HHF7; MCT1; MCT1D
NCBI Protein Information	monocarboxylate transporter 1
UniProt Protein Name	Monocarboxylate transporter 1
UniProt Gene Name	SLC16A1
UniProt Synonym Gene Names	MCT1; MCT 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
