

## Human Prefoldin Subunit 5 (PFDN5) ELISA Kit | PFDN5 elisa kit

Human Prefoldin Subunit 5 (PFDN5) ELISA Kit

CATALOG #  
AAA186655

REACTIVITY  
Human

### PRODUCT SYNONYMS

Prefoldin Subunit 5 (PFDN5); Human Prefoldin Subunit 5 (PFDN5) ELISA Kit; MM1; PFD5; C-Myc-binding protein Mm-1; Myc modulator 1; PFDN5 elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Prefoldin Subunit 5 (PFDN5). No significant cross-reactivity or interference between Prefoldin Subunit 5 (PFDN5) and analogues was observed.                                                                                                                                                                                                                                                                    |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for PFDN5 elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Prefoldin Subunit 5 (PFDN5). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Prefoldin Subunit 5 (PFDN5). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Prefoldin Subunit 5 (PFDN5), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Prefoldin Subunit 5 (PFDN5) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |

| NCBI Official Full Name          | prefoldin subunit 5 |
| NCBI Official Synonym Full Names | prefoldin subunit 5 |
| NCBI Official Symbol             | PFDN5               |
| NCBI Protein Information         | prefoldin subunit 5 |
| UniProt Protein Name             | Prefoldin subunit 5 |
| UniProt Gene Name                | PFDN5               |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
