

Human Dystrobrevin Beta (DTNb) ELISA Kit | DTNb elisa kit

Human Dystrobrevin Beta (DTNb) ELISA Kit

CATALOG #
AAA186822

REACTIVITY
Human

PRODUCT SYNONYMS

Dystrobrevin Beta (DTNb); Human Dystrobrevin Beta (DTNb) ELISA Kit; DTNb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Dystrobrevin Beta (DTNb). No significant cross-reactivity or interference between Dystrobrevin Beta (DTNb) and analogues was observed.
Sequence Length	654
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.053ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Dystrobrevin Beta (DTNb) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Dystrobrevin Beta (DTNb) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for DTNb elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Dystrobrevin Beta (DTNb). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Dystrobrevin Beta (DTNb). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Dystrobrevin Beta (DTNb), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Dystrobrevin Beta (DTNb) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	58865954
NCBI GeneID	362715
NCBI Accession #	NP_001012191.1
NCBI GenBank Nucleotide #	NM_001012191.1
UniProt Accession #	P84060; Q66HF4
Molecular Weight	73,878 Da
NCBI Official Full Name	dystrobrevin beta
NCBI Official Synonym Full Names	dystrobrevin, beta
NCBI Official Symbol	Dtnb
NCBI Protein Information	dystrobrevin beta
UniProt Protein Name	Dystrobrevin beta
UniProt Gene Name	Dtnb
UniProt Synonym Gene Names	DTN-B

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
