

Human Transmembrane Protease, Serine 6 (TMPRSS6) ELISA Kit | TMPRSS6 elisa kit

Human Transmembrane Protease, Serine 6 (TMPRSS6) ELISA Kit

CATALOG #
AAA186928

REACTIVITY
Human

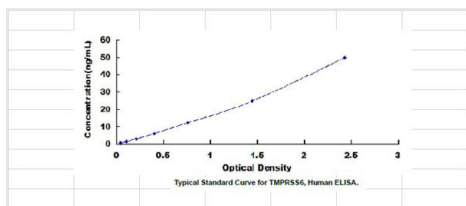

PRODUCT SYNONYMS

Transmembrane Protease; Serine 6 (TMPRSS6); Human Transmembrane Protease; Serine 6 (TMPRSS6) ELISA Kit; Matriptase-2; TMPRSS6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of TMPRSS6. No significant cross-reactivity or interference between TMPRSS6 and analogues was observed.
Sequence Length	824
Samples	Human tissue homogenates, cell lysates and other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	0.78-50ng/mL
Sensitivity	< 0.30ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level TMPRSS6 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level TMPRSS6 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100.
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for TMPRSS6 elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of TMPRSS6 in human tissue homogenates, cell lysates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to TMPRSS6. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to TMPRSS6. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain TMPRSS6, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of TMPRSS6 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	23957702
NCBI GeneID	164656
NCBI Accession #	NP_705837.1
NCBI GenBank Nucleotide #	NM_153609.3
UniProt Accession #	Q8IU80; Q5TI06; Q6ICC2; Q6UXD8; Q8IUE2; Q8IXV8; B0QYB4; B0QYB7; B0QYB8
Molecular Weight	91,333 Da
NCBI Official Full Name	transmembrane protease serine 6 isoform 2
NCBI Official Synonym Full Names	transmembrane protease, serine 6
NCBI Official Symbol	TMPRSS6
NCBI Official Synonym Symbols	IRIDA
NCBI Protein Information	transmembrane protease serine 6
UniProt Protein Name	Transmembrane protease serine 6
UniProt Gene Name	TMPRSS6

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
