

Human Ribonucleotide Reductase M1 (RRM1) ELISA Kit | RRM1 elisa kit

Human Ribonucleotide Reductase M1 (RRM1) ELISA Kit

CATALOG #
AAA186968

REACTIVITY
Human

PRODUCT SYNONYMS

Ribonucleotide Reductase M1 (RRM1); Human Ribonucleotide Reductase M1 (RRM1) ELISA Kit; R1; RIR1; RR1; Ribonucleoside-diphosphate reductase large subunit; RRM1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Ribonucleotide Reductase M1 (RRM1). No significant cross-reactivity or interference between Ribonucleotide Reductase M1 (RRM1) and analogues was observed.
Sequence Length	792
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.312-20ng/mL
Sensitivity	< 0.115ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Ribonucleotide Reductase M1 (RRM1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Ribonucleotide Reductase M1 (RRM1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for RRM1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Ribonucleotide Reductase M1 (RRM1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Ribonucleotide Reductase M1 (RRM1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Ribonucleotide Reductase M1 (RRM1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Ribonucleotide Reductase M1 (RRM1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	13676332
NCBI GeneID	6240
UniProt Accession #	P23921; Q9UNN2
Molecular Weight	90,070 Da
NCBI Official Full Name	Ribonucleotide reductase M1
NCBI Official Synonym Full Names	ribonucleotide reductase catalytic subunit M1
NCBI Official Symbol	RRM1
NCBI Official Synonym Symbols	R1; RR1; RIR1
NCBI Protein Information	ribonucleoside-diphosphate reductase large subunit
UniProt Protein Name	Ribonucleoside-diphosphate reductase large subunit
UniProt Gene Name	RRM1
UniProt Synonym Gene Names	RR1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
