

Rat Pregnancy Zone Protein (PZP) ELISA Kit | PZP elisa kit

Rat Pregnancy Zone Protein (PZP) ELISA Kit

CATALOG #
AAA187049

REACTIVITY
Rat

PRODUCT SYNONYMS

Pregnancy Zone Protein (PZP); Rat Pregnancy Zone Protein (PZP) ELISA Kit; CPAMD6; C3 and PZP-like alpha-2-macroglobulin domain-containing protein 6; PZP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Pregnancy Zone Protein (PZP). No significant cross-reactivity or interference between Pregnancy Zone Protein (PZP) and analogues was observed.
Sequence Length	1482
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates and Other Biological Fluids
Detection Range	7.8-500ng/mL
Sensitivity	< 2.7ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Pregnancy Zone Protein (PZP) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Pregnancy Zone Protein (PZP) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for PZP elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Pregnancy Zone Protein (PZP). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Pregnancy Zone Protein (PZP). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Pregnancy Zone Protein (PZP), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Pregnancy Zone Protein (PZP) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	162809334
NCBI GeneID	5858
NCBI Accession #	NP_002855.2
NCBI GenBank Nucleotide #	NM_002864.2
UniProt Accession #	P20742; Q15273; Q2NKL2; Q7M4N7; A6ND27
Molecular Weight	140,368 Da
NCBI Official Full Name	pregnancy zone protein
NCBI Official Synonym Full Names	PZP, alpha-2-macroglobulin like
NCBI Official Symbol	PZP
NCBI Official Synonym Symbols	CPAMD6
NCBI Protein Information	pregnancy zone protein
UniProt Protein Name	Pregnancy zone protein
UniProt Gene Name	PZP
UniProt Synonym Gene Names	CPAMD6

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
