

Rat Methionine Adenosyltransferase I Alpha (MAT1a) ELISA Kit | MAT1a elisa kit

Rat Methionine Adenosyltransferase I Alpha (MAT1a) ELISA Kit

CATALOG #
AAA187095

REACTIVITY
Rat

PRODUCT SYNONYMS

Methionine Adenosyltransferase I Alpha (MAT1a); Rat Methionine Adenosyltransferase I Alpha (MAT1a) ELISA Kit; MAT; SAMS; MATA1; SAMS1; AMS1; S-Adenosylmethionine Synthetase; S-adenosylmethionine synthase isoform type-1; MAT1a elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Methionine Adenosyltransferase I Alpha (MAT1a). No significant cross-reactivity or interference between Methionine Adenosyltransferase I Alpha (MAT1a) and analogues was observed.
Sequence Length	396
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates and Other Biological Fluids
Detection Range	0.781-50ng/mL
Sensitivity	< 0.32ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Methionine Adenosyltransferase I Alpha (MAT1a) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Methionine Adenosyltransferase I Alpha (MAT1a) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for MAT1a elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Methionine Adenosyltransferase I Alpha (MAT1a). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Methionine Adenosyltransferase I Alpha (MAT1a). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Methionine Adenosyltransferase I Alpha (MAT1a), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Methionine Adenosyltransferase I Alpha (MAT1a) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	163914853
NCBI GeneID	100127858
NCBI Accession #	NP_001106625.1
NCBI GenBank Nucleotide #	NM_001113154.1
NCBI Official Full Name	S-adenosylmethionine synthase
NCBI Official Synonym Full Names	methionine adenosyltransferase I, alpha
NCBI Official Symbol	mat1a
NCBI Protein Information	S-adenosylmethionine synthase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
