

Human Replication Initiator 1 (REPIN1) ELISA Kit | REPIN1 elisa kit

Human Replication Initiator 1 (REPIN1) ELISA Kit

CATALOG #
AAA187110

REACTIVITY
Human

PRODUCT SYNONYMS

Replication Initiator 1 (REPIN1); Human Replication Initiator 1 (REPIN1) ELISA Kit; AP4; RIP60; ZNF464; Zfp464; Replication Initiation Region Protein(60kD); Zinc Finger Protein 464; 60 kDa origin-specific DNA-binding protein; ATT-binding protein; REPIN1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Replication Initiator 1 (REPIN1). No significant cross-reactivity or interference between Replication Initiator 1 (REPIN1) and analogues was observed.
Sequence Length	624
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates and Other Biological Fluids
Detection Range	0.312-20ng/mL
Sensitivity	< 0.129ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Replication Initiator 1 (REPIN1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Replication Initiator 1 (REPIN1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for REPIN1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Replication Initiator 1 (REPIN1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Replication Initiator 1 (REPIN1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Replication Initiator 1 (REPIN1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Replication Initiator 1 (REPIN1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	51105891
NCBI GeneID	29803
UniProt Accession #	Q9BWE0; Q7LE03; Q9BUZ6; Q9NZH2; Q9UMP5; C9J3L7; D3DWZ1
Molecular Weight	69,920 Da
NCBI Official Full Name	replication initiator 1
NCBI Official Synonym Full Names	replication initiator 1
NCBI Official Symbol	REPIN1
NCBI Official Synonym Symbols	AP4; RIP60; ZNF464; Zfp464
NCBI Protein Information	replication initiator 1
UniProt Protein Name	Replication initiator 1
UniProt Gene Name	REPIN1
UniProt Synonym Gene Names	RIP60; ZNF464

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
