

Human V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN) ELISA Kit | LYN elisa kit

Human V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN) ELISA Kit

CATALOG # AAA187113	REACTIVITY Human
-------------------------------	----------------------------

PRODUCT SYNONYMS

V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN); Human V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN) ELISA Kit; JTK8; p53Lyn; p56Lyn; Tyrosine-protein kinase Lyn; Lck/Yes-related novel protein tyrosine kinase; LYN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN). No significant cross-reactivity or interference between V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN) and analogues was observed.
Sequence Length	491
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.062ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for LYN elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog (LYN) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	50960723
NCBI GeneID	4067
UniProt Accession #	P07948; A0AVQ5
Molecular Weight	56,033 Da
NCBI Official Full Name	V-yes-1 Yamaguchi sarcoma viral related oncogene homolog
NCBI Official Synonym Full Names	LYN proto-oncogene, Src family tyrosine kinase
NCBI Official Symbol	LYN
NCBI Official Synonym Symbols	JTK8; p53Lyn; p56Lyn
NCBI Protein Information	tyrosine-protein kinase Lyn
UniProt Protein Name	Tyrosine-protein kinase Lyn
UniProt Gene Name	LYN
UniProt Synonym Gene Names	JTK8

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
