

Human Leprecan Like Protein 1 (LEPREL1) ELISA Kit | LEPREL1 elisa kit

Human Leprecan Like Protein 1 (LEPREL1) ELISA Kit

CATALOG #
AAA187367

REACTIVITY
Human

PRODUCT SYNONYMS

Leprecan Like Protein 1 (LEPREL1); Human Leprecan Like Protein 1 (LEPREL1) ELISA Kit; MLAT4; P3H2; Prolyl 3-Hydroxylase 2; Myxoid liposarcoma-associated protein 4; LEPREL1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Leprecan Like Protein 1 (LEPREL1). No significant cross-reactivity or interference between Leprecan Like Protein 1 (LEPREL1) and analogues was observed.
Sequence Length	680
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.055ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Leprecan Like Protein 1 (LEPREL1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Leprecan Like Protein 1 (LEPREL1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for LEPREL1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Leprecan Like Protein 1 (LEPREL1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Leprecan Like Protein 1 (LEPREL1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Leprecan Like Protein 1 (LEPREL1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Leprecan Like Protein 1 (LEPREL1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	269784853
NCBI GeneID	100313646
NCBI Accession #	NP_001161578.1
NCBI GenBank Nucleotide #	NM_001168106.1
NCBI Official Full Name	leprecan-like protein
NCBI Official Symbol	LOC100313646
NCBI Protein Information	leprecan-like protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
