

Human LIM And SH3 Protein 1 (LASP1) ELISA Kit | LASP1 elisa kit

Human LIM And SH3 Protein 1 (LASP1) ELISA Kit

CATALOG #
AAA187586

REACTIVITY
Human

PRODUCT SYNONYMS

LIM And SH3 Protein 1 (LASP1); Human LIM And SH3 Protein 1 (LASP1) ELISA Kit; MLN50; Metastatic lymph node gene 50 protein; LASP1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of LIM And SH3 Protein 1 (LASP1). No significant cross-reactivity or interference between LIM And SH3 Protein 1 (LASP1) and analogues was observed.
Sequence Length	205
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.065ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level LIM And SH3 Protein 1 (LASP1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level LIM And SH3 Protein 1 (LASP1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for LASP1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to LIM And SH3 Protein 1 (LASP1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to LIM And SH3 Protein 1 (LASP1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain LIM And SH3 Protein 1 (LASP1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of LIM And SH3 Protein 1 (LASP1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	5453710
NCBI GeneID	3927
NCBI Accession #	NP_006139.1
NCBI GenBank Nucleotide #	NM_006148.3
UniProt Accession #	Q14847; Q96ED2; Q96IG0; B4DGQ0
Molecular Weight	23,181 Da
NCBI Official Full Name	LIM and SH3 domain protein 1 isoform a
NCBI Official Synonym Full Names	LIM and SH3 protein 1
NCBI Official Symbol	LASP1
NCBI Official Synonym Symbols	MLN50; Lasp-1
NCBI Protein Information	LIM and SH3 domain protein 1
UniProt Protein Name	LIM and SH3 domain protein 1
UniProt Gene Name	LASP1
UniProt Synonym Gene Names	MLN50; LASP-1; MLN 50

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
