

Human Granzyme H (GZMH) ELISA Kit | GZMH elisa kit

Human Granzyme H (GZMH) ELISA Kit

CATALOG #
AAA187729

REACTIVITY
Human

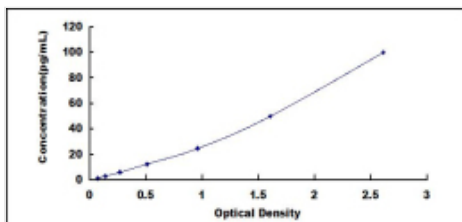

PRODUCT SYNONYMS

Granzyme H (GZMH); Human Granzyme H (GZMH) ELISA Kit; CCP-X; CGL-2; CSP-C; CTLA1; CTSLG2; Cathepsin G-Like 2; Protein h-CCPX; Cytotoxic T-lymphocyte proteinase; Cytotoxic serine protease C; GZMH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Granzyme H (GZMH). No significant cross-reactivity or interference between Granzyme H (GZMH) and analogues was observed.
Sequence Length	115
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	1.56-100pg/mL
Sensitivity	< 0.61pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Granzyme H (GZMH) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Granzyme H (GZMH) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for GZMH elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Granzyme H (GZMH). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Granzyme H (GZMH). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Granzyme H (GZMH), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Granzyme H (GZMH) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	15529990
NCBI GeneID	2999
NCBI Accession #	NP_219491.1
NCBI GenBank Nucleotide #	NM_033423.4
UniProt Accession #	P20718; Q6XGZ0; Q6XGZ1; G3V2C5
Molecular Weight	12,609 Da
NCBI Official Full Name	granzyme H isoform 1 preproprotein
NCBI Official Synonym Full Names	granzyme H
NCBI Official Symbol	GZMH
NCBI Official Synonym Symbols	CCP-X; CGL-2; CSP-C; CTLA1; CTSG L2
NCBI Protein Information	granzyme H
UniProt Protein Name	Granzyme H
UniProt Gene Name	GZMH
UniProt Synonym Gene Names	CGL2; CTSG L2; CTSG L2; CSP-C

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
