

Human High Temperature Requirement Factor A4 (HTRA4) ELISA Kit | HTRA4 elisa kit

Human High Temperature Requirement Factor A4 (HTRA4) ELISA Kit

CATALOG #
AAA187855

REACTIVITY
Human

PRODUCT SYNONYMS

High Temperature Requirement Factor A4 (HTRA4); Human High Temperature Requirement Factor A4 (HTRA4) ELISA Kit; HtrA Serine Peptidase 4; HTRA4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of High Temperature Requirement Factor A4 (HTRA4). No significant cross-reactivity or interference between High Temperature Requirement Factor A4 (HTRA4) and analogues was observed.
Sequence Length	476
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.78-50ng/mL
Sensitivity	< 0.32ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level High Temperature Requirement Factor A4 (HTRA4) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level High Temperature Requirement Factor A4 (HTRA4) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for HTRA4 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to High Temperature Requirement Factor A4 (HTRA4). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to High Temperature Requirement Factor A4 (HTRA4). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain High Temperature Requirement Factor A4 (HTRA4), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of High Temperature Requirement Factor A4 (HTRA4) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	119583694
NCBI GeneID	203100
UniProt Accession #	P83105; Q542Z4; Q6PF13
Molecular Weight	50,979 Da
NCBI Official Full Name	HtrA serine peptidase 4
NCBI Official Synonym Full Names	HtrA serine peptidase 4
NCBI Official Symbol	HTRA4
NCBI Protein Information	serine protease HTRA4
UniProt Protein Name	Serine protease HTRA4
UniProt Gene Name	HTRA4

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
