

Human Adipocyte Plasma Membrane Associated Protein (APMAP) ELISA Kit | APMAP elisa kit

Human Adipocyte Plasma Membrane Associated Protein (APMAP) ELISA Kit

CATALOG # AAA187953	REACTIVITY Human
-------------------------------	----------------------------

PRODUCT SYNONYMS

Adipocyte Plasma Membrane Associated Protein (APMAP); Human Adipocyte Plasma Membrane Associated Protein (APMAP) ELISA Kit; C20orf3; BSCv; APMAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Adipocyte Plasma Membrane Associated Protein (APMAP). No significant cross-reactivity or interference between Adipocyte Plasma Membrane Associated Protein (APMAP) and analogues was observed.
Sequence Length	289
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.066ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Adipocyte Plasma Membrane Associated Protein (APMAP) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Adipocyte Plasma Membrane Associated Protein (APMAP) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for APMAP elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Adipocyte Plasma Membrane Associated Protein (APMAP). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Adipocyte Plasma Membrane Associated Protein (APMAP). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Adipocyte Plasma Membrane Associated Protein (APMAP), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Adipocyte Plasma Membrane Associated Protein (APMAP) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	24308201
NCBI GeneID	57136
NCBI Accession #	NP_065392.1
NCBI GenBank Nucleotide #	NM_020531.2
UniProt Accession #	Q9HDC9; Q6UVZ8; Q9GZS8; Q9NUB2; A8K514; B4DXG1
Molecular Weight	32,161 Da
NCBI Official Full Name	adipocyte plasma membrane-associated protein
NCBI Official Synonym Full Names	adipocyte plasma membrane associated protein
NCBI Official Symbol	APMAP
NCBI Official Synonym Symbols	BSCv; C20orf3
NCBI Protein Information	adipocyte plasma membrane-associated protein
UniProt Protein Name	Adipocyte plasma membrane-associated protein
UniProt Gene Name	APMAP
UniProt Synonym Gene Names	C20orf3

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
