

Sheep Fibroblast Growth Factor 1 (FGF1) ELISA Kit | FGF1 elisa kit

Sheep Fibroblast Growth Factor 1 (FGF1) ELISA Kit

CATALOG #
AAA188080

REACTIVITY
Sheep

PRODUCT SYNONYMS

Fibroblast Growth Factor 1 (FGF1); Sheep Fibroblast Growth Factor 1 (FGF1) ELISA Kit; ECGF; AFGF; ECGFA; ECGFB; FGF-Alpha; FGFA; HBGF1; Acidic Fibroblast Growth Factor; heparin-binding growth factor 1; Endothelial Cell Growth Factor; Beta; FGF1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Specificity	This assay has high sensitivity and excellent specificity for detection of Fibroblast Growth Factor 1, Acidic (FGF1). No significant cross-reactivity or interference between Fibroblast Growth Factor 1, Acidic (FGF1) and analogues was observed.
Sequence Length	155
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates and Other Biological Fluids
Detection Range	3.12-200pg/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 1.22pg/mL
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Fibroblast Growth Factor 1, Acidic (FGF1) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Fibroblast Growth Factor 1, Acidic (FGF1) were tested on 3 different plates, 8 replicates in each plate. $CV(\%) = SD/mean \times 100$ Intra-Assay: $CV < 10\%$ Inter-Assay: $CV < 12\%$
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for FGF1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Fibroblast Growth Factor 1, Acidic (FGF1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Fibroblast Growth Factor 1, Acidic (FGF1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Fibroblast Growth Factor 1, Acidic (FGF1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Fibroblast Growth Factor 1, Acidic (FGF1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	426229774
NCBI GeneID	101109353
NCBI Accession #	XP_004008958.1
NCBI GenBank Nucleotide #	XP_004008958.1
UniProt Accession #	Q7M303
NCBI Official Full Name	fibroblast growth factor 1 isoform X1
NCBI Official Symbol	FGF1
NCBI Official Synonym Symbols	aFGF; FGF-1; HBGF-1
NCBI Protein Information	fibroblast growth factor 1
UniProt Protein Name	Fibroblast growth factor 1
UniProt Gene Name	FGF1
UniProt Synonym Gene Names	FGF-1; aFGF; HBGF-1
UniProt Entry Name	FGF1_SHEEP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
