

Pig Thrombospondin 1 (THBS1) ELISA Kit | THBS1 elisa kit

Pig Thrombospondin 1 (THBS1) ELISA Kit

CATALOG #
AAA188119

REACTIVITY
Pig

PRODUCT SYNONYMS

Thrombospondin 1 (THBS1); Pig Thrombospondin 1 (THBS1) ELISA Kit; TSP1; Thrombospondin-1p180; THBS1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Pig
Specificity	This assay has high sensitivity and excellent specificity for detection of Thrombospondin 1 (THBS1). No significant cross-reactivity or interference between Thrombospondin 1 (THBS1) and analogues was observed.
Sequence Length	1170
Assay Type	Double-antibody Sandwich
Samples	Plasma
Detection Range	78-5,000pg/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 32pg/mL
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Thrombospondin 1 (THBS1) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Thrombospondin 1 (THBS1) were tested on 3 different plates, 8 replicates in each plate. $CV(\%) = SD/mean \times 100$ Intra-Assay: $CV < 10\%$ Inter-Assay: $CV < 12\%$
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for THBS1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Thrombospondin 1 (THBS1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Thrombospondin 1 (THBS1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Thrombospondin 1 (THBS1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Thrombospondin 1 (THBS1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	40317626
NCBI GeneID	7057
NCBI GenBank Nucleotide #	NP_003237.2
UniProt Accession #	P07996
NCBI Official Full Name	thrombospondin-1
NCBI Official Synonym Full Names	thrombospondin 1
NCBI Official Symbol	THBS1
NCBI Official Synonym Symbols	TSP; THBS; TSP1; TSP-1; THBS-1
NCBI Protein Information	thrombospondin-1
UniProt Protein Name	Thrombospondin-1
UniProt Gene Name	THBS1
UniProt Synonym Gene Names	TSP; TSP1
UniProt Entry Name	TSP1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
