

## Rabbit Pigment Epithelium Derived Factor (PEDF) ELISA Kit | PEDF elisa kit

Rabbit Pigment Epithelium Derived Factor (PEDF) ELISA Kit

CATALOG #  
**AAA188174**

REACTIVITY  
**Rabbit**

### PRODUCT SYNONYMS

Pigment Epithelium Derived Factor (PEDF); Rabbit Pigment Epithelium Derived Factor (PEDF) ELISA Kit; SERPINF1; EPC1; PIG35; SDF3; Serpin F1; Cell proliferation-inducing gene 35; Serpin Peptidase Inhibitor;Clade F Member 1(Alpha-2 Antiplasmin); Stromal Cell Derived Factor 3; PEDF elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rabbit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Pigment Epithelium Derived Factor (PEDF). No significant cross-reactivity or interference between Pigment Epithelium Derived Factor (PEDF) and analogues was observed.                                                                                                                                                                                                                                          |
| Sequence Length         | 418                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Assay Type              | Double-antibody Sandwich                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Samples                 | Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates and Other Biological Fluids                                                                                                                                                                                                                                                                                                                                                                                       |
| Detection Range         | 0.312-20ng/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Sensitivity             | The minimum detectable dose of this kit is typically less than 0.117ng/mL                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Precision               | Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Pigment Epithelium Derived Factor (PEDF) were tested 20 times on one plate, respectively.<br>Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Pigment Epithelium Derived Factor (PEDF) were tested on 3 different plates, 8 replicates in each plate.<br>$CV(\%) = SD/mean \times 100$<br>Intra-Assay: $CV < 10\%$<br>Inter-Assay: $CV < 12\%$     |
| Preparation and Storage | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

ADDITIONAL INFORMATION

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for PEDF elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Pigment Epithelium Derived Factor (PEDF). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Pigment Epithelium Derived Factor (PEDF). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Pigment Epithelium Derived Factor (PEDF), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Pigment Epithelium Derived Factor (PEDF) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
