

Mouse Nexilin (NEXN) ELISA Kit | NEXN elisa kit

Mouse Nexilin (NEXN) ELISA Kit

CATALOG #
AAA188280

REACTIVITY
Mouse

PRODUCT SYNONYMS

Nexilin (NEXN); Mouse Nexilin (NEXN) ELISA Kit; NELIN; F Actin Binding Protein; NEXN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Nexilin (NEXN). No significant cross-reactivity or interference between Nexilin (NEXN) and analogues was observed.
Sequence Length	607
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 0.057ng/mL
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Nexilin (NEXN) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Nexilin (NEXN) were tested on 3 different plates, 8 replicates in each plate. $CV(\%) = SD/mean \times 100$ Intra-Assay: $CV < 10\%$ Inter-Assay: $CV < 12\%$
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for NEXN elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Nexilin (NEXN). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Nexilin (NEXN). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Nexilin (NEXN), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Nexilin (NEXN) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	240849436
NCBI Accession #	NP_955759.2
NCBI GenBank Nucleotide #	NP_955759.2
UniProt Accession #	Q7TPW1
NCBI Official Full Name	nexilin isoform 2
UniProt Protein Name	Nexilin
UniProt Gene Name	Nexn
UniProt Entry Name	NEXN_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
