

Mouse Ras Related C3 Botulinum Toxin Substrate 1 (Rac1) ELISA Kit | Rac1 elisa kit

Mouse Ras Related C3 Botulinum Toxin Substrate 1 (Rac1) ELISA Kit

CATALOG #
AAA188316

REACTIVITY
Mouse

PRODUCT SYNONYMS

Ras Related C3 Botulinum Toxin Substrate 1 (Rac1); Mouse Ras Related C3 Botulinum Toxin Substrate 1 (Rac1) ELISA Kit; TC-25; p21-Rac1; MIG5; Cell migration-inducing gene 5 protein; Ras-like protein TC25; Rac1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Ras Related C3 Botulinum Toxin Substrate 1 (Rac1). No significant cross-reactivity or interference between Ras Related C3 Botulinum Toxin Substrate 1 (Rac1) and analogues was observed.
Sequence Length	192
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates, Cell Lysates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 0.057ng/mL
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Ras Related C3 Botulinum Toxin Substrate 1 (Rac1) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Ras Related C3 Botulinum Toxin Substrate 1 (Rac1) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for Rac1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Ras Related C3 Botulinum Toxin Substrate 1 (Rac1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Ras Related C3 Botulinum Toxin Substrate 1 (Rac1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Ras Related C3 Botulinum Toxin Substrate 1 (Rac1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Ras Related C3 Botulinum Toxin Substrate 1 (Rac1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	27806443
NCBI GeneID	281440
NCBI GenBank Nucleotide #	NP_776588.1
UniProt Accession #	P62998
NCBI Official Full Name	ras-related C3 botulinum toxin substrate 1
NCBI Official Symbol	RAC1
NCBI Protein Information	ras-related C3 botulinum toxin substrate 1
UniProt Protein Name	Ras-related C3 botulinum toxin substrate 1
UniProt Gene Name	RAC1
UniProt Entry Name	RAC1_BOVIN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
