

Human Testis Expressed Protein 101 (TEX101) ELISA Kit | TEX101 elisa kit

Human Testis Expressed Protein 101 (TEX101) ELISA Kit

CATALOG #
AAA188317

REACTIVITY
Human

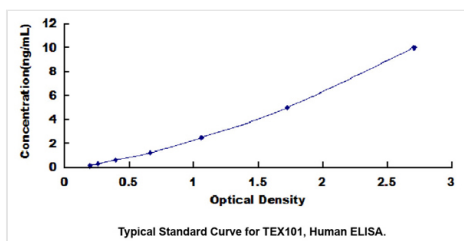

PRODUCT SYNONYMS

Testis Expressed Protein 101 (TEX101); Human Testis Expressed Protein 101 (TEX101) ELISA Kit; SGRG; CT131; Cancer/Testis Antigen 131; Cell surface receptor NYD-SP8; Scleroderma-associated autoantigen; Spermatogenesis-related gene protein; TEX101 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of TEX101. No significant cross-reactivity or interference between TEX101 and analogues was observed.
Sequence Length	249
Assay Type	Quantitative Sandwich
Samples	Human serum, plasma, tissue homogenates, cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.057ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level TEX101 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level TEX101 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for TEX101 elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to TEX101. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to TEX101. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain TEX101, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of TEX101 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of TEX101 in human serum, plasma, tissue homogenates, cell lysates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	194097358
NCBI GeneID	83639
NCBI GenBank Nucleotide #	NP_001123483.1
UniProt Accession #	Q9BY14
NCBI Official Full Name	testis-expressed protein 101 isoform 2
NCBI Official Synonym Full Names	testis expressed 101
NCBI Official Symbol	TEX101
NCBI Official Synonym Symbols	SGRG; CT131; GTPR867; NYD-SP8; PRO1884; SPATA44; TES101RP
NCBI Protein Information	testis-expressed protein 101
UniProt Protein Name	Testis-expressed protein 101
UniProt Gene Name	TEX101

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
