

Human Contactin 6 (CNTN6) ELISA Kit | CNTN6 elisa kit

Human Contactin 6 (CNTN6) ELISA Kit

CATALOG #
AAA188332

REACTIVITY
Human

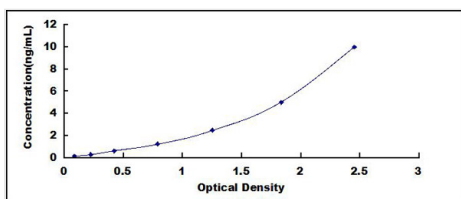

PRODUCT SYNONYMS

Contactin 6 (CNTN6); Human Contactin 6 (CNTN6) ELISA Kit; NB-3; Neural Adhesion Molecule; CNTN6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Contactin 6 (CNTN6). No significant cross-reactivity or interference between Contactin 6 (CNTN6) and analogues was observed.
Sequence Length	1028
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates and Other Biological Fluids
Detection Range	0.156-10ng/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 0.059ng/mL
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Contactin 6 (CNTN6) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Contactin 6 (CNTN6) were tested on 3 different plates, 8 replicates in each plate. $CV(\%) = SD/mean \times 100$ Intra-Assay: $CV < 10\%$ Inter-Assay: $CV < 12\%$
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CNTN6 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Contactin 6 (CNTN6). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Contactin 6 (CNTN6). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Contactin 6 (CNTN6), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Contactin 6 (CNTN6) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1158980005
NCBI GeneID	27255
NCBI GenBank Nucleotide #	NP_001336281.1
NCBI Official Full Name	contactin-6 isoform 1
NCBI Official Synonym Full Names	contactin 6
NCBI Official Symbol	CNTN6
NCBI Official Synonym Symbols	NB3
NCBI Protein Information	contactin-6

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
