

Mouse Cyclophilin A (CYPA) ELISA Kit | CYPA elisa kit

Mouse Cyclophilin A (CYPA) High Sensitive ELISA Kit

CATALOG # AAA188531	REACTIVITY Mouse	APPLICATIONS ELISA
-------------------------------	----------------------------	------------------------------

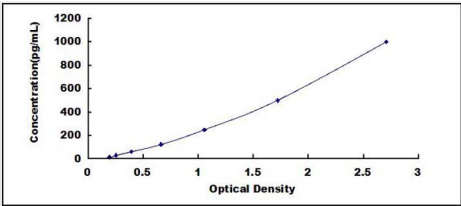

PRODUCT SYNONYMS

Cyclophilin A (CYPA); Mouse Cyclophilin A (CYPA) High Sensitive ELISA Kit; Cyclophilin A; PPIA; CyP-A; CYPH; Peptidylprolyl Isomerase A; Peptidyl-Prolyl Isomerase A; Peptidyl-prolyl cis-trans isomerase A; Cyclosporin A-binding protein; CYPA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of High Sensitive Cyclophilin A (CYPA). No significant cross-reactivity or interference between High Sensitive Cyclophilin A (CYPA) and analogues was observed.
Sequence Length	164
Assay Type	Double-antibody Sandwich
Samples	Serum, plasma and other biological fluids
Detection Range	15.6-1000pg/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 5.8pg/mL
Applicable Applications for CYPA elisa kit	ELISA
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level High Sensitive Cyclophilin A (CYPA) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level High Sensitive Cyclophilin A (CYPA) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Test Principle	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to High Sensitive Cyclophilin A (CYPA). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to High Sensitive Cyclophilin A (CYPA). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain High Sensitive Cyclophilin A (CYPA), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of High Sensitive Cyclophilin A (CYPA) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

NCBI AND UNIPROT INFORMATION

NCBI GI #	6679439
NCBI GeneID	268373
NCBI Accession #	NP_032933.1
NCBI GenBank Nucleotide #	NP_032933.1
UniProt Accession #	P17742
NCBI Official Full Name	peptidyl-prolyl cis-trans isomerase A
NCBI Official Synonym Full Names	peptidylprolyl isomerase A
NCBI Official Symbol	Ppia
NCBI Official Synonym Symbols	Cphn; CypA; SP18; CyP-18; 2700098C05
NCBI Protein Information	peptidyl-prolyl cis-trans isomerase A
UniProt Protein Name	Peptidyl-prolyl cis-trans isomerase A
UniProt Gene Name	Ppia
UniProt Synonym Gene Names	PPIase A
UniProt Entry Name	PPIA_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
