

Bovine Casein Alpha (CSN1) ELISA Kit | CSN1 elisa kit

Bovine Casein Alpha (CSN1) High Sensitive ELISA Kit

CATALOG # AAA188600	REACTIVITY Bovine	APPLICATIONS ELISA
-------------------------------	-----------------------------	------------------------------

PRODUCT SYNONYMS

Casein Alpha (CSN1); Bovine Casein Alpha (CSN1) High Sensitive ELISA Kit; Casein Alpha; CASa; CSN1; CSN1S1; Casein Alpha S1; Caseinate; Caseine/caséine/Kasein/caseína; Alpha-S1-casein; Casoxin-D; CSN1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Specificity	This assay has high sensitivity and excellent specificity for detection of High Sensitive Casein Alpha (CSN1). No significant cross-reactivity or interference between High Sensitive Casein Alpha (CSN1) and analogues was observed.
Sequence Length	214
Assay Type	Double-antibody Sandwich
Samples	Milk
Detection Range	0.156-10ng/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 0.058ng/mL
Applicable Applications for CSN1 elisa kit	ELISA
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level High Sensitive Casein Alpha (CSN1) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level High Sensitive Casein Alpha (CSN1) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Test Principle	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to High Sensitive Casein Alpha (CSN1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to High Sensitive Casein Alpha (CSN1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain High Sensitive Casein Alpha (CSN1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of High Sensitive Casein Alpha (CSN1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

NCBI AND UNIPROT INFORMATION

NCBI GI #	30794348
NCBI Accession #	NP_851372.1
NCBI GenBank Nucleotide #	NP_851372.1
UniProt Accession #	P02662
NCBI Official Full Name	alpha-S1-casein
UniProt Protein Name	Alpha-S1-casein
UniProt Gene Name	CSN1S1
UniProt Entry Name	CASA1_BOVIN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
