

Mouse Fibroblast Growth Factor 15 (FGF15) ELISA Kit | FGF15 elisa kit

Mouse Fibroblast Growth Factor 15 (FGF15) High Sensitive ELISA Kit

CATALOG # AAA188603	REACTIVITY Mouse	APPLICATIONS ELISA
-------------------------------	----------------------------	------------------------------

PRODUCT SYNONYMS

Fibroblast Growth Factor 15 (FGF15); Mouse Fibroblast Growth Factor 15 (FGF15) High Sensitive ELISA Kit; Fibroblast Growth Factor 15; FGF15 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of High Sensitive Fibroblast Growth Factor 15 (FGF15). No significant cross-reactivity or interference between High Sensitive Fibroblast Growth Factor 15 (FGF15) and analogues was observed.
Sequence Length	218
Assay Type	Competitive Inhibition
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	6.25-100pg/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 2.85pg/mL
Applicable Applications for FGF15 elisa kit	ELISA
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level High Sensitive Fibroblast Growth Factor 15 (FGF15) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level High Sensitive Fibroblast Growth Factor 15 (FGF15) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Test Principle	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to High Sensitive Fibroblast Growth Factor 15 (FGF15) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled High Sensitive Fibroblast Growth Factor 15 (FGF15) and unlabeled High Sensitive Fibroblast Growth Factor 15 (FGF15) (Standards or samples) with the pre-coated antibody specific to High Sensitive Fibroblast Growth Factor 15 (FGF15). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of High Sensitive Fibroblast Growth Factor 15 (FGF15) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of High Sensitive Fibroblast Growth Factor 15 (FGF15) in the sample.
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

NCBI AND UNIPROT INFORMATION

NCBI GI #	6679777
NCBI GeneID	14170
NCBI Accession #	NP_032029.1
NCBI GenBank Nucleotide #	NP_032029.1
UniProt Accession #	O35622
NCBI Official Full Name	fibroblast growth factor 15
NCBI Official Synonym Full Names	fibroblast growth factor 15
NCBI Official Symbol	Fgf15
NCBI Official Synonym Symbols	FGF19
NCBI Protein Information	fibroblast growth factor 15
UniProt Protein Name	Fibroblast growth factor 15
UniProt Gene Name	Fgf15
UniProt Synonym Gene Names	FGF-15
UniProt Entry Name	FGF15_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
