

Mouse Nesfatin 1 (NES1) ELISA Kit | NES1 elisa kit

Mouse Nesfatin 1 (NES1) Mini Samples ELISA Kit

CATALOG # AAA188684	REACTIVITY Mouse	APPLICATIONS ELISA
-------------------------------	----------------------------	------------------------------

PRODUCT SYNONYMS

Nesfatin 1 (NES1); Mouse Nesfatin 1 (NES1) Mini Samples ELISA Kit; Nesfatin 1; NES1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Mini Samples Nesfatin 1 (NES1). No significant cross-reactivity or interference between Mini Samples Nesfatin 1 (NES1) and analogues was observed.
Sequence Length	420
Assay Type	Competitive Inhibition
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	493.8-40,000pg/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 187.7pg/mL
Applicable Applications for NES1 elisa kit	ELISA
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Mini Samples Nesfatin 1 (NES1) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Mini Samples Nesfatin 1 (NES1) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Test Principle	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Mini Samples Nesfatin 1 (NES1) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Mini Samples Nesfatin 1 (NES1) and unlabeled Mini Samples Nesfatin 1 (NES1) (Standards or samples) with the pre-coated antibody specific to Mini Samples Nesfatin 1 (NES1). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Mini Samples Nesfatin 1 (NES1) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Mini Samples Nesfatin 1 (NES1) in the sample.
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

NCBI AND UNIPROT INFORMATION

NCBI GI #	194440700
NCBI Accession #	NP_001123951.1
NCBI GenBank Nucleotide #	NP_001123951.1
UniProt Accession #	P81117
NCBI Official Full Name	nucleobindin-2
UniProt Protein Name	Nucleobindin-2
UniProt Gene Name	Nucb2
UniProt Synonym Gene Names	Nefa
UniProt Entry Name	NUCB2_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
