

Wingless Type MMTV Integration Site Family, Member 5A (WNT5A) CLIA Kit | WNT5A clia kit

Multi-species Wingless Type MMTV Integration Site Family, Member 5A (WNT5A) CLIA Kit

CATALOG # AAA189145	REACTIVITY Human, Mouse, Rat	APPLICATIONS CLIA (Chemiluminescence Immunoassay)
-------------------------------	--	---

PRODUCT SYNONYMS

Wingless Type MMTV Integration Site Family; Member 5A (WNT5A); Multi-species Wingless Type MMTV Integration Site Family; Member 5A (WNT5A) CLIA Kit; Human/Mouse/Rat Wingless Type MMTV Integration Site Family; Member 5A (WNT5A) (Sandwich CLIA) CLIA Kit; WNT5A clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human, Mouse, Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Wingless Type MMTV Integration Site Family, Member 5A (WNT5A). No significant cross-reactivity or interference between Wingless Type MMTV Integration Site Family, Member 5A (WNT5A) and analogues was observed.
Sequence Length	365
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	13.7-10,000pg/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 4.9pg/mL
Applicable Applications for WNT5A clia kit	CLIA (Chemiluminescence Immunoassay)
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Wingless Type MMTV Integration Site Family, Member 5A (WNT5A) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Wingless Type MMTV Integration Site Family, Member 5A (WNT5A) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Test Principle	The microplate provided in this kit has been pre-coated with an antibody specific to Wingless Type MMTV Integration Site Family, Member 5A (WNT5A). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Wingless Type MMTV Integration Site Family, Member 5A (WNT5A). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Wingless Type MMTV Integration Site Family, Member 5A (WNT5A) level in the sample or standard.
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1307742036
NCBI Official Full Name	wingless-type MMTV integration site family, member 5A

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
