

Mouse Apolipoprotein A5 (APOA5) ELISA Kit | APOA5 elisa kit

Mouse Apolipoprotein A5 (APOA5) Wide-range ELISA Kit

CATALOG # AAA189196	REACTIVITY Mouse	APPLICATIONS ELISA
-------------------------------	----------------------------	------------------------------

PRODUCT SYNONYMS

Apolipoprotein A5 (APOA5); Mouse Apolipoprotein A5 (APOA5) Wide-range ELISA Kit; Apolipoprotein A5; Apo-A5; APOA-V; APOAV; RAP3; Regeneration-associated protein 3; APOA5 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Wide-range Apolipoprotein A5 (APOA5). No significant cross-reactivity or interference between Wide-range Apolipoprotein A5 (APOA5) and analogues was observed.
Sequence Length	368
Assay Type	Double-antibody Sandwich
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	1.56-100ng/mL
Sensitivity	The minimum detectable dose of this kit is typically less than 0.64ng/mL
Applicable Applications for APOA5 elisa kit	ELISA
Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level Wide-range Apolipoprotein A5 (APOA5) were tested 20 times on one plate, respectively. Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level Wide-range Apolipoprotein A5 (APOA5) were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100 Intra-Assay: CV<10% Inter-Assay: CV<12%
Test Principle	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Wide-range Apolipoprotein A5 (APOA5). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Wide-range Apolipoprotein A5 (APOA5). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Wide-range Apolipoprotein A5 (APOA5), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Wide-range Apolipoprotein A5 (APOA5) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

NCBI AND UNIPROT INFORMATION

NCBI GI #	31560003
NCBI GeneID	66113
NCBI Accession #	NP_536682.2
NCBI GenBank Nucleotide #	NP_536682.2
UniProt Accession #	Q8C7G5
NCBI Official Full Name	apolipoprotein A-V
NCBI Official Synonym Full Names	apolipoprotein A-V
NCBI Official Symbol	Apoa5
NCBI Official Synonym Symbols	RAP3; Apoav; 1300007O05Rik
NCBI Protein Information	apolipoprotein A-V
UniProt Protein Name	Apolipoprotein A-V
UniProt Gene Name	Apoa5
UniProt Synonym Gene Names	Rap3; Apo-AV; ApoA-V

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
