

Rat Insulin Like Protein 3 (INSL3) ELISA Kit | INSL3 elisa kit

Insulin Like Protein 3 (INSL3) ELISA Kit

CATALOG # AAA189400	REACTIVITY Rat	APPLICATIONS ELISA
-------------------------------	--------------------------	------------------------------

PRODUCT SYNONYMS

Insulin Like Protein 3 (INSL3); Insulin Like Protein 3 (INSL3) ELISA Kit; RLNL; RLF; Relaxin-Like Factor; Leydig Cell; Leydig insulin-like peptide; INSL3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of INSL3. No significant cross-reactivity or interference between INSL3 and analogues was observed.
Samples	Serum, plasma and other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	3.12-200pg/mL
Sensitivity	< 1.17pg/mL
Applicable Applications for INSL3 elisa kit	ELISA
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level INSL3 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level INSL3 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for INSL3 elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of INSL3 in rat serum, plasma and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to INSL3. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to INSL3. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain INSL3, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of INSL3 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	26024191
NCBI GeneID	114215
NCBI Accession #	NP_446132.1
NCBI GenBank Nucleotide #	NM_053680.1
UniProt Accession #	Q9WUK0; Q9WUK1
Molecular Weight	14,110 Da
NCBI Official Full Name	insulin-like 3
NCBI Official Synonym Full Names	insulin-like 3
NCBI Official Symbol	Insl3
NCBI Official Synonym Symbols	Rlf
NCBI Protein Information	insulin-like 3
UniProt Protein Name	Insulin-like 3
UniProt Gene Name	Insl3
UniProt Synonym Gene Names	Rlf; Ley-I-L

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
