

Porcine thrombin-antithrombin complex (TAT) ELISA Kit | TAT elisa kit

Porcine thrombin-antithrombin complex (TAT) ELISA Kit

CATALOG #
AAA18949

REACTIVITY
Porcine

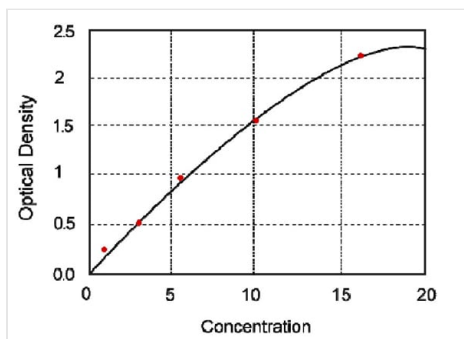

PRODUCT SYNONYMS

thrombin-antithrombin complex (TAT); Porcine thrombin-antithrombin complex (TAT) ELISA Kit; TAT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	30-9000ng/L
Sensitivity	14.15ng/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for TAT elisa kit

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Porcine TAT antibody. TAT present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Porcine TAT Antibody is added and binds to TAT in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated TAT antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Porcine TAT. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

Intended Uses: This sandwich kit is for the accurate quantitative detection of Porcine thrombin-antithrombin complex (also known as TAT) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
