

Mouse Cold Inducible RNA Binding Protein (CIRBP) ELISA Kit | CIRBP elisa kit

Mouse Cold Inducible RNA Binding Protein (CIRBP) ELISA Kit

CATALOG #
AAA189862

REACTIVITY
Mouse

PRODUCT SYNONYMS

Cold Inducible RNA Binding Protein (CIRBP); Mouse Cold Inducible RNA Binding Protein (CIRBP) ELISA Kit; CIRP; A18HNRNP; Glycine-Rich RNA Binding Protein; CIRBP/Cold Inducible RNA Binding Protein; CIRBP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of CIRBP. No significant cross-reactivity or interference between CIRBP and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Mouse tissue homogenates, cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.057ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CIRBP were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CIRBP were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	Store at 4 degree C for 1 month/-20 degree C for long-term (within shelf life) Shelf Life: 8 months The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for CIRBP elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to CIRBP. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to CIRBP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CIRBP, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of CIRBP in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of CIRBP in mouse tissue homogenates, cell lysates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	6680946
NCBI GeneID	12696
NCBI Accession #	NP_031731.1
NCBI GenBank Nucleotide #	NM_007705.3
UniProt Accession #	P60824; O09069; O09148; Q3V1A6; Q61413
Molecular Weight	22.6 kDa
NCBI Official Full Name	cold-inducible RNA-binding protein
NCBI Official Synonym Full Names	cold inducible RNA binding protein
NCBI Official Symbol	Cirbp
NCBI Official Synonym Symbols	Cirp; R74941
NCBI Protein Information	cold-inducible RNA-binding protein
UniProt Protein Name	Cold-inducible RNA-binding protein
UniProt Gene Name	Cirbp
UniProt Synonym Gene Names	Cirp

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
