

Mouse Tsukushin (TSK) ELISA Kit | TSK elisa kit

Mouse Tsukushin (TSK) ELISA Kit

CATALOG #
AAA189879

REACTIVITY
Mouse

PRODUCT SYNONYMS

Tsukushin (TSK); Mouse Tsukushin (TSK) ELISA Kit; E2IG4; TSKU; LRRC54; Tsukushi; E2-induced gene 4 protein; Leucine Rich Repeat Containing 54; Tsukushi Small Leucine Rich Proteoglycan Homolog; TSK/Tsukushin; TSK elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of tsukushin. No significant cross-reactivity or interference between tsukushin and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Mouse serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	15.6-1,000pg/mL
Sensitivity	< 6.0pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level tsukushin were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level tsukushin were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	Store at 4 degree C for 1 month/-20 degree C for long-term (within shelf life) Shelf Life: 8 months The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for TSK elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to tsukushin. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to tsukushin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain tsukushin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of tsukushin in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of tsukushin in mouse serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	67972425
NCBI GeneID	244152
NCBI Accession #	NP_001019790.1
NCBI GenBank Nucleotide #	NM_001024619.3
UniProt Accession #	Q8CBR6; Q4W655
Molecular Weight	38,362 Da
NCBI Official Full Name	tsukushin
NCBI Official Synonym Full Names	tsukushi, small leucine rich proteoglycan
NCBI Official Symbol	Tsku
NCBI Official Synonym Symbols	Tsk; E2ig4; Lrrc54; 9530051K01Rik
NCBI Protein Information	tsukushin
UniProt Protein Name	Tsukushin
UniProt Gene Name	Tsku
UniProt Synonym Gene Names	Lrrc54; Tsk; Tsukushi
UniProt Entry Name	TSK_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
