

Mouse Defensin Alpha 2 (DEFa2) ELISA Kit | DEFa2 elisa kit

Mouse Defensin Alpha 2 (DEFa2) ELISA Kit

CATALOG #
AAA189888

REACTIVITY
Mouse

PRODUCT SYNONYMS

Defensin Alpha 2 (DEFa2); Mouse Defensin Alpha 2 (DEFa2) ELISA Kit; Defcr2; Defensin-Related Cryptdin-2; Cryptdin-1; DEFa2/Defensin Alpha 2; DEFa2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of DEFa2. No significant cross-reactivity or interference between DEFa2 and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Mouse serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	1.56-100ng/mL
Sensitivity	< 0.54ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level DEFa2 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level DEFa2 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	Store at 4 degree C for 1 month/-20 degree C for long-term (within shelf life) Shelf Life: 8 months The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for DEFa2 elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to DEFa2. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to DEFa2. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain DEFa2, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of DEFa2 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of DEFa2 in mouse serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.
Product Categories/Family for DEFa2 elisa kit	Human gene deletion

NCBI AND UNIPROT INFORMATION

NCBI GI #	1706339
UniProt Accession #	P28309; P82293; Q60616; Q62537
Molecular Weight	10,560 Da
NCBI Official Full Name	Alpha-defensin 2
UniProt Protein Name	Alpha-defensin 2
UniProt Gene Name	Defa2
UniProt Synonym Gene Names	Defcr2

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
