

Human Anti-Immunodeficiency Virus Antibody (HIV-Ab) ELISA Kit | HIV-Ab elisa kit

Human Anti-Immunodeficiency Virus Antibody (HIV-Ab) ELISA Kit

CATALOG #
AAA190337

REACTIVITY
Human

PRODUCT SYNONYMS

Anti-Immunodeficiency Virus Antibody (HIV-Ab); Human Anti-Immunodeficiency Virus Antibody (HIV-Ab) ELISA Kit; HIV-Ab elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma and other biological fluids
Assay Type	Qualitative Sandwich
Preparation and Storage	Store at 2-8 degree C. Please refer to Instruction Manual.

ADDITIONAL INFORMATION

Related Product Information for HIV-Ab elisa kit

Intended Uses: For the qualitative detection of Human Anti-immunodeficiency virus antibody (HIV-Ab) concentration in serum, plasma and other biological fluids.

Principle of the Assay: This assay employs a two-site sandwich ELISA to qualitative HIV-Ab in Human serum, plasma. An HIV antigen has been pre-coated onto a microplate. Control and samples are pipetted into the wells and any HIV present is bound by the immobilized antigen. After removing any unbound substances, a HRP- Conjugated antigen is added to the wells. Following a wash to remove any unbound HRP-Conjugated reagent, a substrate solution is added to the wells and color develops in proportion to the amount of HIV-Ab bound in the initial step. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
